

GSM Cable Line to connect to telecom headsets

- ▶ GSM cables allow for connection of selected mobile phones to any CC- and SH-headset
- ▶ A smart, high-quality accessory for mobile professionals
- ▶ Supporting the superb voice transmission and noise suppression of Sennheiser Communications' telecom headsets

The GSM Cable Line is the right accessory for professionals on the go who do not want to compromise on perfect voice transmission. The Line includes 6 variants: 5 variants to connect selected mobile phones to SH and CC telecom headsets and 1 extension cable to connect MB headsets to Sony Ericsson desk stands CDS-60 and CDS-65.

- ▶ You can use the same headset for your mobile phone as for your desk phone (with applicable bottom cable).
- ▶ When changing mobile phone, just exchange the bottom cable accordingly. You don't need to exchange the headset.
- ▶ Guaranteed clear voice transmission while calling thanks to the noise canceling microphones of our telecom headsets
- ▶ Featuring superior quality mobile phone connector
- ▶ Connects to any Sennheiser Communications telecom headset with an Easy Disconnect connection
